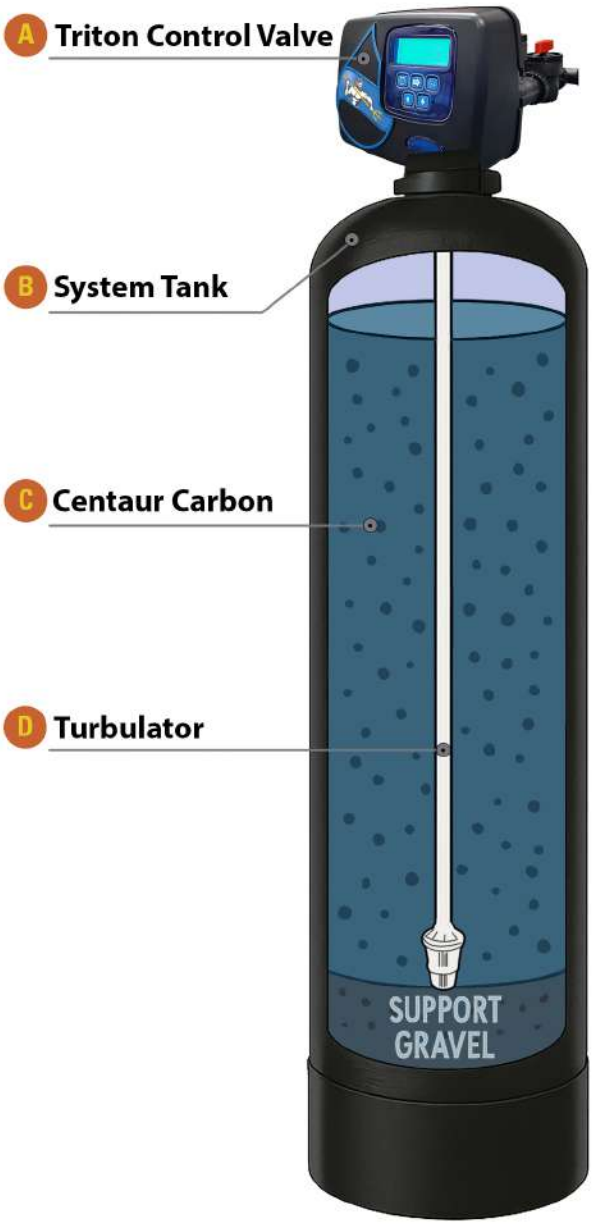
# SULFUR TITAN™

## A POWERFUL SOLUTION FOR THAT ROTTEN EGG SMELLING HYDROGEN SULFIDE



### System Sizes

10'x 54:

12'x 52:

13'x 54:

POSEIDON

### The Filtration Components

A **Triton Control Valve -** Fully automated control valve performs periodic backwash cycles with set preferences specific to water at a time convenient for customer

B **System Tank -** Fiberglass/polyethylene tank engineered for lasting strength and dependable operation

C **Centaur Carbon -** Catalytic media captures hydrogen sulfide from the water through a natural oxidation process. No chemicals or salt required

D **Turbulator -** Water is flushed back through the distributer tube to lift and break up the media

### How It Works

1. Unfiltered water is introduced into the system through the back port, flowing through the control valve, and proceeding to the tank
2. The media absorbs and oxidizes the gas as water passes through the tank, eliminating odors and improving water quality
3. Water is flushed back through the distributer tube to lift and break up the media
